

In the Claims:

This listing of claims will replace all prior versions, and listings, of claims in this application:

1. (Currently Amended) A cable lock comprising:
a flexible cable;
a lock body including a passageway therethrough; and
a combination lock mechanism including a set of combination dials, ~~[[and]]~~ a lever arm,
and a user rotatable knob connected with the lever arm, wherein said lever arm causes a locking member to move into and out of engagement with said flexible cable when said flexible cable is inserted into said passageway.
2. (Original) The cable lock of claim 1, wherein said lever arm allows said locking member to move into and out of three positions:
an unlocked position, wherein said cable can be inserted into and removed from said passageway;
a cinch position, wherein said cable can only be inserted into said passageway; and
a locked position, wherein said cable can not be inserted or removed from said passageway.
3. (Original) The cable lock of claim 1, wherein said cable includes an end fixably secured to said lock body.
4. (Canceled).
5. (Currently Amended) The cable lock of claim ~~[[4]]~~ 1, wherein said knob includes a breakable portion that will disengage the knob from the lever arm when sufficient force is applied to said knob.
6. (Original) The cable lock of claim 1, wherein said combination lock mechanism includes a reset feature allowing new combinations to be set.

7. (Original) The cable lock of claim 6, wherein said reset feature includes a reset button located on a portion of said lock body.
8. (Original) The cable lock of claim 1, wherein at least one of said set of combination dials includes a shoulder that prevents access between said at least one of said set of combination dials and said lock body.
9. (Original) The cable lock of claim 1, wherein said lock body includes indication features that indicate which direction the cable is to be inserted into the passageway.
10. (Original) The cable lock of claim 1 further comprising a spring member located within said passageway that allows said cable to be inserted into said passageway only in one direction.
11. (Currently Amended) The cable lock of claim 1, wherein said ~~locking member~~ lock mechanism includes a rotatable cam and locking clamp.
12. (Original) The cable lock of claim 11, wherein said locking clamp slides along a sloped surface in order to engage and disengage said cable.
13. (Original) The cable lock of claim 1 further comprising a pivotable clamp located at one end of said cable.
14. (Original) The cable lock of claim 1 further comprising a protective covering that selectively covers said set of combination dials.
15. (Currently Amended) A cable lock comprising:
 - (a) a flexible cable;
 - (b) a lock body including a passageway therethrough; and
 - (c) lock mechanism, wherein said lock mechanism comprises:
 - (i) a set of combination dials ~~having~~ movable to an unlocking combination;

- (ii) a rotatable cam;
- (iii) ~~a knob~~ an actuating member; and
- (iv) a shaft selectively engageable with said cam;

wherein said cam rotates to provide an unlocked position only when said set of combination dials are manipulated to said unlocking combination.

16. (Currently Amended) The cable lock of claim 15 wherein the cam rotates to engage and disengage a locking clamp, wherein said locking clamp engages said cable in said passageway when said cam disengages said locking clamp.

17. (Original) The cable lock of claim 15, wherein said cable lock includes three positions: an unlocked position, wherein said cable can be inserted into and removed from said passageway;

a cinch position, wherein said cable can only be inserted into said passageway; and

a locked position, wherein said cable can not be inserted or removed from said passageway.

18. (Original) The cable lock of claim 15, wherein said cable includes an end fixably secured to said lock body.

19. (Original) The cable lock of claim 15 further including a reset feature allowing new combinations to be set.

20. (Original) The cable lock of claim 19, wherein said reset feature includes a reset button located on a portion of said lock body.

21. (Currently Amended) The cable lock of claim 15, wherein at least one of said set of combination dials includes a shoulder that prevents access between said at least one of said set of combination dials and said lock body.

22. (Currently Amended) The cable lock of claim 15, wherein said lock body includes at

least one indication features that feature to indicate which direction the cable is to be inserted into the passageway.

23. (Original) The cable lock of claim 15 further comprising a spring member located within said passageway that allows said cable to be inserted into said passageway only in one direction.

24. (Original) The cable lock of claim 15 further comprising a pivotable clamp located at one end of said cable.

25. (Original) The cable lock of claim 24, wherein said pivotable clamp include a detent mechanism that secures said pivotable clamp in a predefined orientation.

26. (Original) The cable lock of claim 15 further comprising a protective covering that selectively covers said set of combination dials.

27. (Currently Amended) A cable lock comprising:

- (a) a flexible cable;
- (b) a lock body including a passageway therethrough; and
- (c) lock mechanism, wherein said lock mechanism comprises:
 - (i) a set of combination dials;
 - (ii) a rotatable cam;
 - (iii) ~~a knob~~ an actuating member; and
 - (iv) a connecting member connecting said cam with said ~~knob~~ actuating member;wherein said connecting member is breakable such that said ~~knob~~ actuating member will disconnect from said cam when sufficient force is applied to said ~~knob~~ actuating member.

28. (Currently Amended) A cable lock comprising:

- (a) a flexible cable;
- (b) a lock body including a passageway therethrough; and
- (c) a lock mechanism comprising:
 - (i) a set of combination dials connected to a corresponding set of hubs;

- (ii) a rotatable cam;
 - (iii) a user rotatable knob connected to said cam; and
 - (iv) a reset button that disengages said set of combination dials from said corresponding set of hubs, thereby allowing a combination to be set.
29. (Original) The cable lock of claim 28 further comprising a pivotable clamp located at one end of said cable.
30. (Original) The cable lock of claim 29, wherein said pivotable clamp include a detent mechanism that secures said pivotable clamp in a predefined orientation.
31. (Original) The cable lock of claim 28, wherein said cable lock includes three positions:
an unlocked position, wherein said cable can be inserted into and removed from said passageway;
a cinch position, wherein said cable can only be inserted into said passageway; and
a locked position, wherein said cable can not be inserted or removed from said passageway.
32. (Currently Amended) A cable lock comprising:
(a) a flexible cable;
(b) a lock body including a passageway therethrough;
(c) a lock mechanism comprising:
~~(i) a set of combination dials connected to a corresponding set of hubs; and~~
~~(ii) a knob for actuating said knob; and~~
(d) a pivotable clamp ~~located at one end~~ affixed to an end portion of said cable.
33. (Currently Amended) The cable lock of claim 32, wherein said pivotable clamp include a detent mechanism that secures said pivotable clamp in a predefined orientation.
34. (Canceled).
